

Postdoctoral Research Scholar Training Position Arizona State University Research Training in Substance Use Prevention: Closing the Research-Practice Gap

Arizona State University's Department of Psychology and REACH Institute in The College of Liberal Arts and Sciences and College of Health Solutions invite applications for one or two NIDA-funded T32 Postdoctoral Fellowship(s) focused on closing the research-practice gap in substance use prevention.

Take the next step in your training to develop skills to address the research-practice gap in substance use prevention. ASU offers NIH-funded postdoctoral training with a focus on prevention, implementation science, health equity, and quantitative methods. The program is individually tailored to meet the needs and interests of individual fellows and includes mentored research experience with some of the leading research experts in the field, a professional development seminar, and relevant coursework. Trainees select multiple mentors from a large and multidisciplinary faculty whose work informs the implementation of preventive interventions with children, youth, and families in settings such as schools, healthcare, community behavioral health, and family courts, as well as eHealth interventions. Past trainees have gone onto careers at prestigious institutions both in academia and industry. Emphases include implementation science for the adoption and sustainability of preventive interventions in regular service delivery settings, interventions for culturally diverse populations, and advanced quantitative research methods in prevention science. In addition, trainees have the ability to work with research-practice partnerships, including practitioners and policymakers, actively addressing individual and societal problems related to substance use and addiction.

Training is for a two-year period, with the potential for a third year on a case-by-case basis. The position(s) are full-time, fiscal-year (12-month), benefits-eligible appointment with no tenure implications. For more information regarding benefits, visit

Anticipated start dates: first position before June 30, 2024; second position after July 1, 2024. Complete applications can be submitted after the initial application deadline and will be reviewed on a rolling basis until the position is filled.

Minimum Qualifications:

- Candidates must have earned a PhD (within the last 5 years or anticipated by the beginning of the appointment) in a field relevant to substance use prevention and/or implementation science.
- Candidates must be a US citizen or permanent resident.
- Demonstrated commitment to working with faculty, staff, students and communities to advance the principles of the [ASU Charter](#).

Desired Qualifications:

The program is particularly interested in applicants who have research or personal experiences that prepare them to work with communities or groups historically underrepresented in research and higher education.

Interested candidates submit required documents as pdf(s) through Interfolio <http://apply.interfolio.com/139541>:

1. curriculum vita
2. statement of research and training goals
3. three letters of recommendation to be uploaded by your recommenders to Interfolio directly

Initial deadline for receipt of complete applications is **February 16, 2024**; if not filled, review of complete applications will continue every week thereafter until the search is closed.

Inquiries concerning the training program should be addressed to: Dr. Laurie Chassin at laurie.chassin@asu.edu. Be sure to include "T32 Postdoctoral training program" in the subject line when sending emails.
