Appointment Structure

- Two-year appointment with the possibility of a third year, based on trainee progress and funding

Program Expectations

	Predoc	Postdoc
Grant writing	Submission of F31 (or similar) proposal related to substance use prevention	Submission of K01 (or similar) proposal related to substance use prevention
Manuscripts	Peer reviewed manuscripts related to core content areas: substance use prevention, implementation science, digital health, advanced methodology	
Presentations	Annual presentations at national research conferences; practice focused conferences are also encouraged	

Training Components

Trainees will receive comprehensive interdisciplinary training through:

- Individualized training plans
- Research apprenticeships
- T32 seminar series
- Grant-writing development
- Job search preparation
- Training in rigor and reproducibility
- Ethics instruction
- Sessions on:
 - Substance use prevention
 - Implementation science
 - Community engagement

Coursework

- Core courses in addiction and implementation science
- Optional coursework to address training gaps (e.g., advanced quantitative methods)

Additional Learning Opportunities

- Visits from external faculty
- Presentations from community partners

Application Status

All current training slots are filled. We expect to begin recruitment in **Spring 2026**, pending funding for the next project period.

If you are interested in the application process, details from the most recent predoctoral and postdoctoral cycles will be made available here.
